---

I understand that the HHS is finalizing decisions on what to fund and what not to fund in the new health care legislation. I do not want our government to fund the killing of American citizens. Please do not pay for abortion services at any stage of a pregnancy. Over 53 million Americans have already died in the abortion holocaust - please do your part to stop this by not funding it. If killing the baby is not "covered" more women may choose to let the baby live.

Sincerely,  
Carol Springer
